## PROFILE

I am a recent bachelor of software engineering graduate from VIA University College. Throughout my studies, I have honed my teamwork skills and developed systems with a focus on clean code and architectural patterns. I am a pragmatic thinker, detail-oriented, and consistently apply these traits in all my endeavors

## EDUCATION

Software Technology Engineering  
Bachelor Degree  
September 2021 - January 2025  
• VIA University College, Horsens

I have gained knowledge and experience in software engineering principles, practices, programming languages, algorithms, data structures, software architecture, databases, networking and security.

## WORK EXPERIENCE

JavaScript Developer • NESS KE, s.r.o  
Internship  
August 2023 - January 2024

I collaborated with a team of developers. My responsibilities included the development and maintenance of both the front-end and back-end of the application, utilizing technologies such as React, Redux, Node.js, and Express and more.

E-shop Management • Colorhouse.eu  
Freelance  
December 2024 - Now

Managing and providing new solutions for an e-commerce store

## HOBBIES

In my leisure time, I find enjoyment in playing chess. Additionally, I explore my creative side through personal projects using my 3D printer. I am also passionate about IoT and implementing SmartHome solutions
